

## ABOUT US

At Groton Farm School, we believe the natural world around us is the perfect classroom to inspire wonder, independent learning and critical thinking. We recognize that children learn and grow in response to where they learn. Our school provides a unique opportunity to utilize our diverse, 20-acre landscape as our primary resource for learning. Students are invited to explore our pastures, meadows, forest, apple orchard, and barnyard full of animals every day.

## WHY OUTDOOR LEARNING?

- Ensures your child's needs are met with hands-on and personalized experiences
- Promotes a healthier lifestyle by increasing physical activity while reducing stress and anxiety
- Supports creativity and problem solving while also prioritizing common core standards
- Fosters a collaborative environment with multi-age classrooms that encourage mentoring and leadership
- Increases focus and enhances cognitive development
- Inspires students to become more ecologically aware
- Active lifestyle changes significantly reduce ADHD symptoms

## NATURE-BASED CURRICULUM ROOTED IN WONDER

Through our instruction, facilitation, and guidance, our dedicated instructors help children pull from their natural curiosity, and channel it through lessons on how to think critically, analyze, evaluate, organize, predict, sort and infer. Unique STEM and Language Arts lessons, as well as curriculum specials such as ecological adventure, art, and yoga, all combine to provide more lessons than your student could learn in a traditional classroom.

“

We chose Groton Farm School for our daughter as an alternative to a traditional kindergarten environment because we wanted her to be outside instead of sitting in a classroom. She got so much more than we hoped out of her kindergarten year on the farm—developing her self confidence, and building patience, kindness, and responsibility—that we decided to return for first grade. This year has been wonderful as she is becoming an artist, loving math, learning about the oceans, writing and illustrating books, and waking up excited to learn and have new adventures every school day. She loves GFS so much that sometimes we visit on the weekend!
